Designed to work efficiently both in vertical and horizontal position.

Smart flap for your tools storage. Be always ready.

Spiral hose with universal tools mount.

Extra shock absorber feet for horizontal use.

Ease of use and compactness are the most notable attributes behind new SCHNEIDER PackMaster air compressor.

The times in which you were struggling to bring compressed air where needed are over. Suitcase weighs only 10 kg and can be effortlessly transported with an anti-slip handle everywhere you want.

There is a double set of absorption feet to the point, so that PackMaster can be also placed both vertically and horizontally, being even closer to your requirements.

Although transportation and ease of use are fundamental, compressed air has to be delivered too and this why you are provided with universal air outlet, a spiral hose included and a vain where to store air-tool.

Extra small sizes are not reflecting the performances of SCHNEIDER PackMaster which offers on the contrary important air displacement of 160 l/m, 8 bar pressure and relies on 1,5 HP engine power.

Practical use

Thanks to its lightweight design, PackMaster is the ideal solution for many applications where small size plays a crucial role. Many optional accessories can be used to make your work easier. It can be used in cars, office buildings, workshops and other private and public facilities.

The World of Schneider Airsystems

Care. Trust. Efficiency.

Care

Care is what service is all about: professional service by knowledgeable people, using high-quality original parts.

Trust

Trust is earned by delivering on our promises of reliable, uninterrupted performance and long equipment lifetime.

Efficiency

Equipment efficiency is ensured by regular maintenance. Efficiency of the service organization is how Original Parts and Service make the difference.
