

SILENTMASTER XS SERIES

Silent Piston Air Compressor Range

SilentMaster - XS Series

Discover the benefits of Schneider Airsystems

Founded in 1966, **SCHNEIDER** has become a leading global supplier of compressed air solutions. Its product portfolio covers all compressed air areas: the generation, conditioning, distribution and usage of compressed air. This way we always know what is really important for the profitable operation of your company.

OUR SOLUTIONS:

- High-performance and user-oriented products from the generation to usage
- Innovations and further development of the product portfolio according to customer requirements
- Quality management for assuring the highest quality standards

JOIN THE SILENT REVOLUTION

In our modern world, we are constantly surrounded by noise. In the streets, in the workshop, even in our home silence is a precious gift that we try (and often fail) to find. And despite our search for quietness, we are usually forced to live and work next to noisy machinery that make our lives harder, the air compressor being one of the main causes of a loud and uncomfortable room.

This is why SCHNEIDER has designed the new XS series: to give you the peace and comfort that you deserve in your working environment without compromising on performances. Be it for irregular use, or as the main tool of your business, SCHNEIDER XS will silently help you in all your activities and it will do it without making your life harder. With a noise level of 59 db(A), it's comparable with the loudness of a relaxed conversation between friends, to the point that you will not be able to revert back to a standard, noisy compressor.

However, silence is not the only advantage of the XS range. Under the uniquely designed enclosed pump, beats a powerful heart: the direct-driven element can reach up to 9 bar of pressure, allowing you to use specialized tools that require higher pressure than most common, compact air compressors can deliver.

The fact that the XS is oil-free and direct-driven it is just an additional benefit, as you can have all these advantages without the hassle of frequent maintenance: say good-bye to dirty hands and floors at every oil change, or having to replace the belt of you compressor every few months. The XS range will deliver clean, constant air for hundreds of hours without the need of any intervention.

- Easy maintenance

The direct-driven XS oil-free series require minimal service. Less time for maintenance, more time for work.

- Safety & Comfort

The new compact, innovative enclosed pump provides safety without affecting usability, with a quick access to the on-off button, manometer and pressure switch.

- Less space, more air

A small compressor that outweighs the competition with up to 9 bar of pressure without required additional space in your workshop.

- Many models, same excellent quality

From 1,5 to 2 HP, from 10 to 50 lt for a wide range of combinations. Many variation for a common word: excellence.

- The sound of silence

Enjoy working in a quiet environment thanks to the low noise level of the XS range, your silent business partner.
